VICTORIAN PRODUCTION STATISTICS MONTHLY BULLETIN : NO.64

MARCH, 1956

This Bulletin shows, for certain commodities, the monthly factory production in Victoria. Details of Australian production of these items are published in similar form in the Monthly Bulletin of Production Statistics issued by the Head Office of the Bureau in Canberra. Many of these items are shown in greater detail in other publications of the Bureau issued from Canberra.

For the purpose of the accompanying statistics a "factory" is defined as a manufacturing establishment in which four or more persons are employed or in which power other than hand is used.

Annual totals for 1938-39 and the last five financial years are shown in conjunction with (a) totals for the most recent six monthly and three monthly periods together with comparative figures for the same periods twelve months earlier and (b) monthly totals for each of the latest fifteen months.

Figures up to 1953-54 inclusive represent totals derived where possible from annual factory returns collected by the Victorian Government Statist. It should be noted that in the case of some factories annual returns are accepted for a period other than the normal financial year ended June 30th.

From July 1954 onwards, figures are preliminary and subject to revision.

An index of contents appears on page 2.

The scope of the Bulletin will be widened from time to time to include new information as it becomes available for publication.

The following symbols are used in this bulletin:-

n.a. Not available.

- .. Nil or less than half the final digit normally shown.
- r Figure revised.

A blank space in a column of figures means that the figure concerned is not yet available.
